Main Purpose

We are currently seeking a highly skilled and motivated individual to join a premier team of mechanics at the 48th Civil Engineering Squadron, Royal Air Force Lakenheath, United Kingdom.

The 48th Civil Engineering Squadron requires someone with experience working in sheet metal, carpentry, and masonry in constructing, installing, maintaining, repairing, and modifying structures and items requiring close tolerance fit, structural soundness, fine finishes, and decorative effects.

Duties include using blueprints, sketches, and drawings, specifications, and work orders in construction and maintenance, independently applying methods, techniques, and advanced shop mathematics to construct install, repair, and modify a variety of structures. Performs masonry tasks involved in maintenance, repair, alteration, and construction of interior and exterior surfaces and structures while utilizing correct safety practices and procedures.

If you're looking for a challenging, gratifying career supporting the US Visiting Forces in the United Kingdom - this job is for you; apply today!

Knowledge and Experience Required

Applicants must demonstrate the following:

Please provide detailed work experience as it relates to the required competencies listed below, as this will be used to determine your qualification for this position.

1. Must possess an NVQ/City and Guilds Level 2 in an appropriate discipline (e.g. bricklaying, carpentry, fabrication, and welding) ****You must submit copies with your application form to validate the requirement**** Please refer to the link below for required qualifications: [General Schedule Qualification Standards \(opm.gov\)](https://www.opm.gov/policy-data-oversight/qualifications/general-schedule-qualification-standards/)
2. Skill in cutting and shaping to complete corners; constructing, installing, repairing, and modifying structures; formulating plans and templates involving straight and curved edges or irregular curves, angles, and planes; developing patterns to include geometric projection and triangulation; setting-up, operating, and maintaining a variety of precision equipment and a variety of power/hand tools/equipment; and fabricating complex items from a variety of materials, such as galvanized or stainless steel, black iron, aluminum, copper sheet, magnesium, honeycomb material and alloys is desired.
3. Knowledge of advanced shop mathematics to plan, compute, and lay out more complex projects is desired.
4. Knowledge of safety regulations, practices, and procedures and environmental standards and requirements; and regulations, procedures and policies related to records maintenance and documentation.
5. Ability to inspect and evaluate structural damage to sheet metal systems sufficient to plan and accomplish repairs; produce finished products with precise fits, accurate dimensions, structural soundness, and acceptable appearance; and perform decorative brickwork through placement of bricks of different colors to create various designs and patterns.
6. Ability to read and interpret complex blueprints, diagrams, sketches, and technical specifications; and communicate effectively, both orally and in writing.
