

Incoming Mildenhall Teammates!

Below is key information about shipping pets from the United States to the United Kingdom. We recommend you also do your own research to ensure you have the most accurate and up to date information! The direct link to the needed documents for bringing your pet into the United Kingdom is <https://www.gov.uk/take-pet-abroad>. Another great resource that gives detailed instruction on what needs to be accomplished before bringing your pet into the United Kingdom is the United States Department of Agriculture's (USDA) website <https://www.aphis.usda.gov/aphis/pet-travel/by-country/eu/eu-echinococcus/pet-travel-echinococcus-treatments-uk>.

The completed health certificate **MUST** be endorsed by the United States Department of Agriculture (USDA) after the tapeworm treatment (dogs only) has been done. This should be documented on the UK health certificate by a veterinarian. The easiest way to get this done is to use a military veterinary treatment facility and If you are not near a military vet, then the forms will need to be sent to the USDA for certification via the USDA website above.

MUST DOs:

- Within 5-days of arriving into the UK and no later than 48 hours before arrival, members booked on the patriot express with pet(s) must send their pet's documents (see link above) as separate attachments named under the "pets name" and "owners last name" over to ltm@animalaircare.co.uk
- Animal Aircare LTD will review all documents as a pre-inspection before departing to the UK and will also provide feedback to any documents they deem incorrect
- Once Animal Aircare LTD approves your paperwork, they will email you with a payment link to pay for the UK pet entry fee of approximately £275 per pet

If you have any questions regarding the above information, please email our Traffic Management Team at 100lrs.pax@us.af.mil or the RAF Feltwell Veterinarian Clinic at usaf.lakenheath.48-mdg.mbx.vet-clinic@mail.mil.
