

COVID-19 Testing Frequently Asked Questions (current a/o 17 Aug 21)

Continue to reference most recent installation COVID directives

Changes are in red font

1. Should I get tested? The following patients may be tested for COVID-19:

- a. Individuals who develop symptoms of COVID-19. Contact the 48th Medical Group Appointment Line (226-8010/01638 528010) or the Emergency Room after hours/weekends/holidays via DSN 226-4226 (01638 52 4226). If you receive care from the National Health Service, arrange a test online via <https://www.gov.uk/get-coronavirus-test?priority-taxon=774cee22-d896-44c1-a611-e3109cce8eae>. Symptoms can be found at <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>.
- b. Individuals who have been notified by RAF Lakenheath Public Health or the National Health Service that they were identified as a close contact of someone with laboratory-confirmed COVID-19. You'll be tested near the start of your quarantine period. If you are fully vaccinated (completed full vaccine series at least 2 weeks prior) and do not have symptoms, **you won't need to quarantine but though not required, will be offered a test between 3-5 days after last exposure to the COVID-19 positive individual**. RAF Lakenheath PH (226-8777/01638 52 8777) will coordinate this testing.
- c. You require a test prior to a deployment. Public Health will schedule this testing.
- d. You require a test prior to a procedure being performed by the 48th Medical Group. You'll be tested 24-72 hours prior to the procedure. The clinic performing the procedure will arrange this testing.
- e. You are required to have a test prior to non-deployment related official travel (e.g. PCS, TDY, emergency leave). Your commander will request this testing via the 48th Medical Group. **Plan ahead – results have been available within 24-36 hours (after swab is obtained). Do not contact Public Health or the 48th Medical Group to schedule this testing.**

NOTE: Individuals that tested positive for COVID-19 within the past 90 days and have not developed symptoms since meeting isolation release criteria should generally not be re-tested unless necessary for travel. If the destination country and supporting airline will accept a letter documenting recovery in lieu of a negative test, work through your unit to request this through the 48TH MEDICAL GROUP at least 3 duty days in advance. That memo, along with the positive test result, should be carried with the individual during travel.

2. What tests are the 48th Medical Group performing for COVID-19? The 48th Medical Group is conducting diagnostic viral testing via Polymerase Chain Reaction (PCR). Antibody and antigen testing are not planned at this time.

3. How long do PCR tests take to receive a result? Expect 24-36 hours.

4. What do I do if I have symptoms of COVID-19? Stay home and isolate from others (private room with private bath access). Call the 48th Medical Group Appointment Line or National Health Service and if you will be tested, continue to isolate (except for the scheduled medical appointment for testing) until you receive a negative result and are released by a medical provider. Notify your chain of command. All household members must quarantine in the home until you have received a negative test.

5. What if someone in my household has symptoms of COVID-19? All household members **who are not fully vaccinated** must quarantine in the home until the ill individual has received a negative test (if tested).

6. What if I test positive for COVID-19? Continue to isolate until you meet isolation release criteria:

- No fever for at least 24 hours (w/out use of fever reducing medication).
- Other symptoms have improved
- At least 10 days have passed since your symptoms started. If you never had symptoms, isolate until at least 10 days from the date of your positive test.

Notify your chain of command (sponsors notify for dependents) and (if not tested by the 48th Medical Group) RAF Lakenheath Public Health via 226-8777/01638 52 8777) or after hours via your installation's command post. A medical provider will notify you of the result and RAF Lakenheath Public Health will interview you to learn about your activities, places visited, and close contacts. All household and close contacts must quarantine for 10 days from their last contact with you.

7. What if I'm identified as a close contact by RAF Lakenheath PH or the National Health Service? Notify your chain of command and RAF Lakenheath Public Health via 226-8777/01638 52 8777) or after hours via your installation's command post. **If not fully vaccinated**, RAF Lakenheath Public Health will coordinate testing for you near the start of your quarantine period (unless you don't have symptoms AND you've tested positive within the past 90 days). You'll continue the 10-day quarantine period to completion if you have a negative test result or are not tested. **If fully vaccinated, you do not have to quarantine but will be offered a PCR test 3-5 days after last exposure to the COVID-19 positive individual. This testing is not required.**

8. What is considered close contact? According to the Centers for Disease Control and Prevention, close contact is considered prolonged contact (at least a cumulative 15 minutes over 24 hours) within 6 feet of a confirmed case, but repeated and other higher risk exposures of shorter duration (such as direct contact or coughing directly into the face) may be considered.

9. **Can I “test out” of quarantine?** Unless fully vaccinated, you must complete the full 10-day quarantine period if you were identified as a close contact, starting after the last day of exposure to a confirmed case. There are options for testing out of the 10-day quarantine for return from travel.

- For quarantine due to return from official travel, commanders may direct “Command-directed, medically-executed” testing for personnel who are not fully vaccinated after 5 full days from arrival in England to support mission critical needs. The 48th Medical Group conducts testing 7 days a week. Personnel and dependents can also purchase tests from authorized UK contractors on the same timeline to support shortening of quarantine after return from official travel.
- For non-official/leisure travel individuals may obtain a test via an authorized private provider and discontinue quarantine on the same time schedule; this cost is currently non-reimbursable. A list of providers is available at <https://www.gov.uk/government/publications/list-of-private-providers-of-coronavirus-testing/list-of-private-providers-of-coronavirus-testing#test-to-release-for-international-travel>.
- Completion of the 10-day quarantine is associated with lower potential transmission of illness and should be considered the standard, unless mission, family, or resiliency needs necessitate the above exceptions.

10. **Can I get tested by the 48th Medical Group if it’s required prior to official travel?** Yes. RAF Lakenheath Public Health will continue to coordinate testing associated with pre-deployment travel. For other official travel (e.g. PCS, TDY, and Emergency travel) your unit commander will schedule this testing with 48th Medical Group via a SharePoint site. Plan ahead, as results typically take 24-36 hours. It is optimal to receive results via TriCare online for patient convenience. Please instruct members to register with Tricare Online prior to their test at: <https://www.tricareonline.com/tol2/prelogin/desktopIndex.xhtml>. For those unable to access their results via Tricare Online, they can be requested and picked up Monday – Thursday from 0730-1630 and from 0730-1430 on Friday at the 48th Medical Group’s TRICARE Office (Building 922, 1st floor). **NOTE: On weekends and holidays, results can be picked up from 1030-1130 in the Ambulance Bay.** A lab validation letter is available the 48 FW Connect App under the Medical Group Button and COVID-19 Tab and may assist should there be lab result interpretation issues at the airport. Additionally, to support shorter notice needs, pre-departure testing is available at Heathrow and may be claimed on your travel voucher for reimbursement. See <https://www.heathrow.com/at-the-airport/fly-safe/covid-19-test> for more info. Do not contact Public Health or the 48th Medical Group to schedule this testing.

11. **Can I get tested by the 48th Medical Group if it’s required prior to non-official/leisure travel?** No. A listing of UK-approved general private test providers is available at: <https://www.gov.uk/government/publications/list-of-private-providers-of-coronavirus-testing/list-of-private-providers-of-coronavirus-testing#providers-general-testing>. Additionally, pre-departure testing is available at Heathrow. More information is available online at <https://www.heathrow.com/at-the-airport/fly-safe/covid-19-test>.

12. **Does the 48th Medical Group conduct day 2 and/or day 8 post-travel testing required by England?** No. These Host Nation-required at-home test kits must be booked prior to travel to England via the UK booking portal at <https://quarantinehotelbookings.ctmportal.co.uk/> with details provided on the Passenger Locator Form. For more information visit <https://www.gov.uk/guidance/red-amber-and-green-list-rules-for-entering-england>. Completion of 10 day quarantine is required even if a negative test result; both tests are still required even if using the test-to-release scheme described in #9.

13. **What about Lateral Flow Device (LFD) tests offered by the NHS?** Individuals without symptoms may elect or be required by UK law to take LFD (antigen) at-home COVID tests. If an LFD test indicates a positive result, isolate immediately and household members must quarantine IAW this document and installation COVID directives. Notify flight leadership and RAFL Public Health of this presumptive positive result within 1 hour as described in the Reporting Requirements section. Individuals must also report LFD test results within 24 hours to the UK via <https://www.gov.uk/report-covid19-result>. Positive LFD results must be confirmed via Polymerase Chain Reaction (PCR) via the UK at <https://www.gov.uk/get-coronavirus-test>. If the PCR test result is negative discontinue isolation, and household members/close contacts without COVID symptoms can discontinue quarantine. If the PCR test is positive, isolation and quarantine continue as described in IAW this document and installation COVID directives. Notify flight leadership and RAFL Public Health of either PCR test result.

14. Notify your chain of command for any positive results on COVID tests or if you’ve been identified as a close contact. Additionally notify RAF Lakenheath Public Health via (226-8777/01638 52 8777) or after hours via your installation’s command post if you test positive for COVID by a lab outside the 48th Medical Group or have been identified by the NHS as a close contact.
