Location:	RAF Lakenheath	Vacancy Number	251486
Open Date:	8 July 2024	Close Date	Open Until Filled
Work Hour Per Week	39	Salary (Per Hour)	£14.55 - £15.95

**** Several vacancies may be available - multiple selections can be made from this announcement ***

Main Purpose

We are currently seeking a highly skilled and motivated individual to join a premier team of Industrial Equipment Mechanics at 48 Civil Engineering Squadron, Royal Air Force Lakenheath, United Kingdom.

The primary purpose of this position is to operate, maintain, troubleshoot, and repair single and multiple feed potable and non-potable treatment works/systems, and associated auxiliary equipment, pollution control equipment, laboratory testing equipment, and similar equipment systems. These systems produce fresh drinking water to the exacting UK and US Standards and treat and process the base wide wastewater system and include the wastewater treatment works complying with the requirements of the US and UK Environment Agency. Treating, processing, and supplying drinking water for use in buildings, industrial and institutional facilities, domestic housing, and the treatment of wastewater. The successful applicant will maintain, repair, and test a variety of complex equipment and systems and start, operate, adjust, and stop single or multiple Wastewater Treatment processes and equipment in a controlled compound.

For specific qualification requirements for the position, you can visit:

[Federal Wage System Qualifications \(opm.gov\)](https://www.opm.gov)

Knowledge and Experience Required - Applicants must demonstrate the following:

1. Knowledge of technical practices to perform various operational repairs and preventive maintenance on Wastewater treatment equipment and, auxiliary, and pollution control equipment; water plant equipment including single or multiple stage treatment plant, auxiliary pollution control; and other auxiliary equipment.
2. Knowledge of safety regulations, practices, and procedures.
3. Skill in troubleshooting complex problems through application of prescribed test procedures and equipment.
4. Skill in the use of measuring instruments such as gauges, meters, recorders, analog displays, and computer-generated data to determine operational status and make necessary adjustments.
5. Ability to interpret diagrams, drawings, operating manuals, or special facility procedures to be followed during emergencies, equipment failures, or system malfunctions.
6. Ability to operate auxiliary equipment and pollution control equipment; to operate wastewater and water treatment plants using computer-controlled equipment; and to perform preventive maintenance and various operational repairs.

Other Important Information

- Hours of work: 0730-1600. Start & end times may be modified due to mission needs and in accordance with organization's flexible working policies.
- Will be required to handle and safeguard sensitive information in accordance with applicable US and UK laws, rules, and regulations.
- Must obtain and maintain the appropriate security clearance.
