Job Description

This role is for a professional civil/structural engineer within the Design & Engineering office, supporting RAF Menwith Hill. You will be responsible for managing, planning, and designing significant new construction, renovation, and improvement projects for facilities and utility systems. Key duties include overseeing construction contractors to ensure compliance with project specifications and schedules, as well as programming, budgeting, and executing projects. The position also involves providing consulting services, collecting and analyzing data, and ensuring all work is performed in strict compliance with health, safety, and environmental procedures.

Qualifications and Key skills for the position.

A valid UK driver's license (Category B) is required, in addition to:

A degree in an appropriate scientific field plus one year of specialized experience as per the required key skills, or

HND/City and Guilds/ NVQ Level 5/6 in an appropriate scientific field. Progressively more years of

specialized experience (as outlined in the key skills) are required for qualifications below degree level.

Successful candidates must demonstrate professional knowledge of civil engineering concepts, principles, and practices, incorporating aesthetic and functional design techniques while coordinating seamlessly with architectural and other engineering disciplines. In this role, you will plan, conduct, and record comprehensive site and facility surveys, analyzing the results to recommend timely, economical solutions, and utilize automated data processing systems to effectively accomplish all engineering functions. Using advanced drafting expertise, you will prepare critical project documentation—from preliminary sketches to final construction drawings—while ensuring all engineering methods, materials, and equipment strictly comply with construction standards, contracting procedures, and federal health, safety, and environmental laws.

Additionally, candidates must demonstrate strong administrative and project management capabilities to oversee program planning, budgeting cycles, and financial control systems while navigating the statutory restrictions governing different types of federal funding. This position requires the proven ability to independently plan, organize, and prioritize complex workloads in a fast-paced environment. Finally, exceptional oral and written communication skills are essential to effectively lead multi-disciplinary teams, brief agency stakeholders, and maintain the highly collaborative working relationships necessary to successfully deliver critical infrastructure projects

Conditions of employment

- You will be required to handle and safeguard sensitive information in accordance with applicable US and UK laws, rules and regulations. This position may also be coded as mission essential.
- You may be required to travel by military and/or civilian aircraft, and you may also be required to travel to the US or other country, in the performance of official duties or attend necessary training.
- You will be required to complete a 6-month probationary period.
- Start & end times may be modified due to mission needs and in accordance with organization's flexible working policies. Overtime may be required and you may be assigned other duties not included in this position description, but that are appropriate to the grade and skill set of the incumbent.
- You must be able to communicate effectively both orally and in writing and must obtain and maintain the appropriate security clearance.
- You may act as project liaison with the Army Corps of Engineers or other design agencies as required and serve on A&E selection boards.
- You will have up to 24 months upon appointment to the position to meet the applicable mandatory experience, education, and training requirements.
- The Local National Direct Hire (LNDH) Program does not participate in regular drug testing; however, positions covered by this document may be subject to drug testing upon reasonable suspicion of substance abuse, and safety mishap or accident testing

NOTE: You will require a security clearance and a right to work in the UK

This position may have certain restrictions on US citizens including US dual nationals due to the Status of Forces Agreement.

For additional information contact the LNDH team on 01638 544955.
